Ceramic Tile and Stone Consultants

A National Service Company providing Job Problem Services, Quality Control Services for Product and Installation Methods, Training Programs, Market Research and Outsourcing Services, and Business Planning Consulting to the Ceramic Tile and Stone Industry.

Review Product and Installation Specifications

CTaSC will review existing specifications to investigate and advise suitability of the product and the methods of installation relative to the specified applications and the level of required performance.

Provide Product and Installation Specifications

CTaSC will offer product and installation method recommendations for new or replacement project applications.

Reporting

As required, CTaSC can provide specifications in writing either as an informal summary or as a formal specification in a CSI format.

Quality Control

CTaSC is available to provide recommended quality control installation and inspection procedures during installation that can include job site inspections before, during and after installation.

Testing

CTaSC can provide testing to help determine and substantiate suitability of products and installation methods before, during and after installation

Technical Committee

CTaSC has formed a technical committee that includes an experienced installer, general contractor, architect, engineer, and attorney. This committee is consulted as necessary to ensure thorough and quality services provided by CTaSC
